

## Learning by Building

I'm a Self-Taught Front-End Developer. I've learned the basics of web developement from courses such as Colt Steele's Web Development Bootcamp and FreeCodeCamp's structured exercises, and then I improved my skills with Jonas Schmedtmann's Advanced CSS and JS courses, while creating multiple projects on my own to practice even more.

## Team-work is essential

I have had the opportunity to work as a part of a team during my studies at Human Sciences High School of Acireale, during the "Young apprenticeship programme" (PCTO) where we were involved for the first time in Marketing, consisting of gathering data about a business and then creating social media pages to advertise the latter.

## Becoming a better Dev

I'm looking forward to working on real projects to better understand my limits, acknowledge them, and surpass them as I grow both as a Front-End Developer and as a person while learning even more about this beautiful environment.
